

Let's Put a Worker on the Ballot!

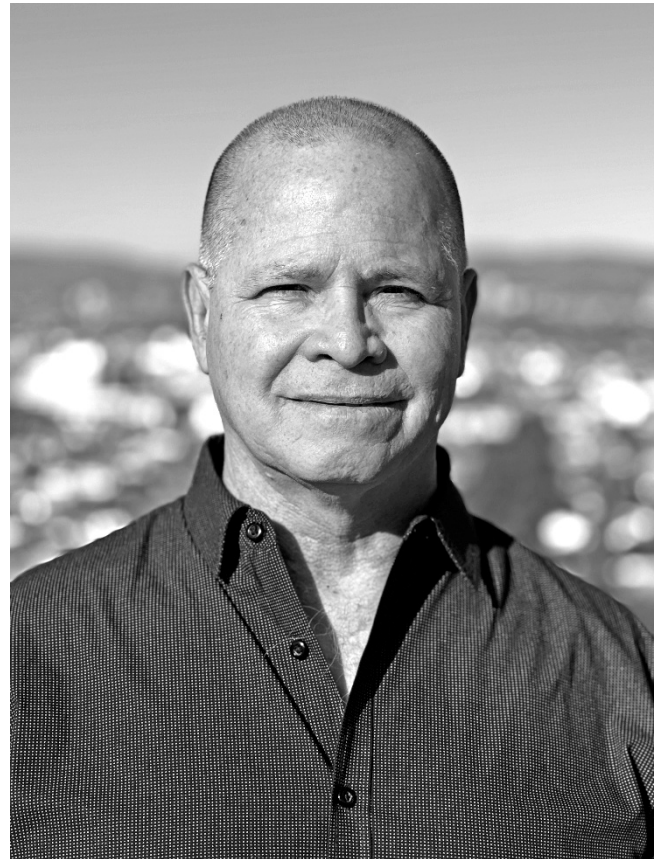

Candidate for U.S. Congress District 37

Juan Rey

I am a train Mechanic
at L.A. Metro.

I am running because:

- Big businesses inflate prices to steal from the workers.
- Only low-wage/part-time jobs.
- Housing costs are too high.
- Public education and essential services are destroyed.
- Barbaric U.S. wars of domination, paid for by workers' tax money.
- Brutal attacks against immigrants are attacks against all workers.

To address these problems, working people need:

- To build our own independent political party.
- A **Working-Class Party** for all workers:
Union and non-union, black and white, immigrant and native-born.
- Only a big fight by the working class can change things.
